Tester Software

0347177523 05/09/2001 tangthihoa37.na@gmail.com https://ln.run/a2ege Nam Tu Liem, Ha Noi

PROFESSIONAL SUMMARY

QA Tester with nearly 4 years of experience in SaaS, E-commerce, and Healthcare systems, with a programming background and system development experience. Strong in end-to-end testing, integration testing, impact analysis, UAT, and test automation using Robot Framework and Selenium (Java/Python).
Aiming to achieve ISTQB certification within the next 6 months to strengthen testing knowledge and enhance professional expertise in accordance with international standards.

WORK EXPERIENCE

Base.vn - A comprehensive business management platform. 2024 - Present

QA Engineer (Manual & Automation)

Manual Testing:

- Created and maintained test documentation (test plans, test cases, and test reports)
- Prepared test data and test environments
- Performed end-to-end testing (UI, API, Database) for products in the Base ecosystem
- Analyzed impact and executed risk-based regression testing
- Conducted integration testing between Base applications and external systems, ensuring data consistency and synchronization
- Performed API testing using Postman and validated data with SQL
- Executed cross-platform testing (Web, Mobile, WebView), ensuring compatibility across browsers, devices, and versions
- Tracked feature development and testing progress to ensure timely releases
- Collaborated with developers for bug management and participated in UAT with stakeholders

Automation Testing:

- One of the first members involved in building and developing the automation testing framework using Robot Framework and Selenium
- Designed, developed, and maintained automated test scripts for core system functionalities
- Contributed to defining the architecture and strategy for automation testing implementation

MOR Software JSC 2022 - 2024

QA Engineer & Java Developer

QA Engineer:

- Designed test cases, prepared test data, executed tests, and reported defects
- Performed manual and automated testing on Web and Mobile (iOS/Android) platforms
- Conducted API testing and validated system behavior
- Collaborated with developers to reproduce issues and verify fixes
- Developed automation test scripts using Selenium and Appium (Java)

Java Developer:

- Developed and maintained application features using Java
- Wrote and optimized SQL queries for data processing
- Analyzed requirements and proposed technical solutions
- Fixed bugs and improved system performance

EDUCATION

Hanoi Open University 03/2022 - Present

Bachelor of Information Technology (Expected Graduation: 08/2026)

GPA: 3.2/4.0

CodeGym Center 02/2022 - 08/2022

Java Full-Stack

Achievement: Excellent

CERTIFICATIONS

Oracle Database Services 2025 Certified	09/2025
MySQL HeatWave Implementation Certified Associate Rel 1	08/2024
Information technology certificate issued at CodeGym	08/2022
Prove Scrum level only at Agile academy	08/2022

SKILLS

Testing Expertise	End-to-End Testing (UI, API, Database), Integration Testing, Regression Testing (Risk-based), UAT, Cross-platform Testing (Web, Mobile, WebView)
Automation	Selenium (Java/Python), Appium, Robot Framework
API & Data	REST API Testing (Postman, Swagger), SQL (MySQL, SQL Server)
Tools	Jira, Git, Figma
Domain Knowledge	Enterprise SaaS, Healthcare, E-commerce, Digital Signature, Identity & Access Management (RBAC)
Programming & Development	Backend: Java, Spring Boot, Spring JPA, Spring Security, JDBC Frontend: HTML, CSS, JavaScript, Thymeleaf, jQuery, Angular Others: Docker
Soft Skills	Proactive & ownership mindset Analytical thinking & problem solving Communication & stakeholder collaboration Self-learning & adaptability
Languages	English (Reading & Writing)

PROJECTS

Base Sign 07/2024 - Present

Technologies: Web & Mobile (iOS/Android), Selenium (Java/Python), Robot Framework, SQL, REST API Testing

Clients: Domestic and international enterprises
Team size: 12 members
QA (Manual & Automation):

- Planned test strategy, assigned tasks, and tracked feature progress
- Performed end-to-end testing (UI, API, Database) for digital signing workflows
- Conducted API and data validation to ensure signature legality, document integrity, and system logic
- Verified digital signatures based on PKCS7 standards and performed integration testing with Base ecosystem & external CA providers
- Executed risk-based regression testing and managed defects
- Developed automation tests (Robot Framework, Selenium) and participated in UAT with stakeholders

Base Drive Pro 07/2024 - Present

Technologies: Web & Mobile (iOS/Android)

Clients: Domestic and international enterprises
Team size: 8 members

QA (Manual Testing):

- Owned QA activities, ensuring product quality across releases
- Led testing for new features, performing impact analysis and risk assessment
- Performed end-to-end testing (UI, API, Database) for document workflows
- Conducted RBAC and integration testing across the Base ecosystem
- Executed API testing (Postman) and validated data using SQL
- Performed risk-based regression testing and managed defects with developers

E-medical 07/2023 - 06/2024

Technologies: Web, Mobile (iOS/Android), Swagger (API Testing), Selenium IDE, Appium

Client: Japan
Team size: 8 members
QA Tester (Manual & Automation):

- Analyzed requirements and clarified business logic for a healthcare system (patients, doctors, pharmacists)
- Designed and executed test cases for key features (appointments, video calls, chat, prescriptions)
- Performed end-to-end testing (Web, Mobile – iOS/Android) for core workflows
- Conducted API (Swagger) and data testing to ensure system logic and data consistency
- Executed regression testing and managed defects with developers
- Implemented automation testing using Selenium IDE and Appium

B2bMall 09/2022 - 06/2023

Technologies: Spring Boot, Thymeleaf, MySQL, HTML/CSS/JavaScript, jQuery, AJAX, Docker

Client: Japan
Team size: 6 members
Full-stack Developer:

- Developed an e-commerce system for product browsing and online purchasing
- Designed and implemented backend functionalities using Spring Boot
- Built user interfaces with HTML, CSS, JavaScript, Thymeleaf, and jQuery
- Designed and optimized MySQL database and wrote SQL queries
- Developed and documented APIs, and created technical designs for features
- Fixed bugs and improved system performance and stability
- Deployed and managed the application using Docker
